QA Testing Report — Website Evaluation

Prepared by: Suraj Navgire | ISTQB CTFL Certified QA Engineer

Target: <https://aivoa.ai> | Environment: Web + Mobile

18

Test Cases

12

Passed

6

Failed

18

Bugs Found

Executive Summary

Manual QA evaluation of the Aivoa.AI website covering functional testing, form validation, responsive design, and UI/UX quality across desktop and mobile environments. Validation failures were the dominant bug category (12 out of 18 bugs), representing the primary security and data integrity risk. Mobile responsive issues were also significant, with layout breakage observed on multiple sections.

Test Cases

TC ID	Test Scenario	Actual Result	Status
TC-001	Verify 'Book a Free Demo' button opens demo form	Demo popup form opened successfully	Pass
TC-002	Verify user cannot submit empty form	Validation messages displayed and form submission prevented	Pass
TC-003	Verify valid form submission	Form submitted successfully	Pass
TC-004	Verify email field validation	Invalid email accepted successfully	Fail
TC-005	Verify mobile number field validation	Invalid mobile number accepted successfully	Fail
TC-006	Verify mandatory field validation	Validation messages displayed successfully	Pass
TC-007	Verify popup close functionality	Popup closed successfully	Pass
TC-008	Verify form data persistence on accidental outside click	Popup closed and entered data was lost	Fail
TC-009	Verify 'Why AI?' header navigation	Successfully navigated to 'Why AI?' section	Pass
TC-010	Verify 'Platform' header navigation	Successfully navigated to 'Platform' section	Pass
TC-011	Verify 'How It Works' header navigation	Successfully navigated to corresponding section	Pass
TC-012	Verify 'Modules' header navigation	Successfully navigated to Modules section	Pass
TC-013	Verify 'Case Studies' header navigation	Successfully navigated to Case Studies section	Pass
TC-014	Verify 'Pricing' header navigation	Successfully navigated to Pricing section/page	Pass
TC-015	Verify 'Contact Us' header navigation	Successfully navigated to Contact Us section	Pass
TC-016	Verify application logo navigation	No navigation occurred after clicking logo	Fail
TC-017	Verify responsive layout on mobile devices	Multiple alignment and responsive UI issues observed	Fail
TC-018	Verify pinch zoom responsiveness	Large blank white space appeared and layout broke	Fail

Bug Report

Bug ID	Title	Type	Severity	Expected Result	Actual Result
BUG-001	Page layout breaks on pinch zoom in mobile view	UI/Responsive	Medium	Layout should remain responsive without extra blank space	Large white space appears and layout alignment breaks
BUG-002	Module details panel opens in compressed/hidden view on mobile	UI/Responsive	Medium	Selected module content should open fully within screen width	Content opens in a very small/compressed panel
BUG-003	Section alignment breaks on mobile view causing improper card layout	UI/Responsive	Medium	All cards and content should be properly aligned within screen	Cards appear unevenly aligned on mobile devices
BUG-004	Email field accepts invalid email with multiple special characters	Validation	Medium	System should reject invalid email format and display validation	Invalid email format is accepted successfully
BUG-005	Email field accepts invalid email without proper format	Validation	Medium	Proper email validation message should appear	Invalid email is accepted by system
BUG-006	Phone number field accepts more than 10 digits	Validation	High	System should restrict mobile number length	Field accepts more than allowed digits
BUG-007	Name field accepts numeric-only values	Validation	High	Name field should accept valid alphabetic names only	Numeric-only input is accepted
BUG-008	Name field accepts special characters only	Validation	High	System should reject symbol-only names	Symbols are accepted as valid name
BUG-009	Name field accepts emoji characters	Validation	High	Emojis should not be allowed in name field	Emoji input is accepted successfully
BUG-010	Form submits successfully with single-character input in mandatory fields	Validation	High	System should enforce minimum character validation before submission	Form submission proceeds with invalid minimal input
BUG-011	Phone number field accepts alphabetic characters	Validation	High	Phone field should accept numeric values only	Alphabetic characters are accepted in phone field
BUG-012	Phone number field accepts special symbols	Validation	High	Special characters should not be accepted in phone field	Symbols are accepted successfully
BUG-013	Phone number field accepts emoji characters	Validation	Medium	Emojis should not be accepted in phone number field	Emoji characters are accepted successfully
BUG-014	Company Name field accepts special symbols only	Validation	Medium	Company Name field should reject symbol-only input	Symbols are accepted successfully
BUG-015	Company Name field accepts single-character input	Validation	Medium	System should enforce minimum character validation	Single-character company name is accepted

Bug ID	Title	Type	Severity	Expected Result	Actual Result
BUG-016	Demo form closes on outside click causing complete data loss	Usability	High	System should prevent accidental closure or preserve entered data	Form closes immediately and all entered data is lost
BUG-017	Clicking application logo does not navigate user to homepage	Functional/Usability	Low	Clicking on logo should redirect user to homepage or scroll to top	Clicking on logo does not perform any navigation action
BUG-018	Poor CTA button visibility and alignment issue in pricing section	UI/UX	Low	CTA button should be properly styled, aligned, and visually consistent	Button appears stretched/plain and visually inconsistent
